

Setup Guide — CTP150CM

IMPORTANT:
Refer to www.extron.com for the user manual and installation instructions before connecting the product to the power supply.

WARNING

Installation and service must be performed by authorized personnel only. These products must be used with UL approved, grounded electrical wall boxes.

The Extron CTP150CM is a seven button, contact closure, remote control panel that emulates many of the front panel functions of the TPT150 switching and transmission system, and is used to control the switcher remotely. This guide provides instructions for experienced installers to set up the CTP150CM.

Step 1

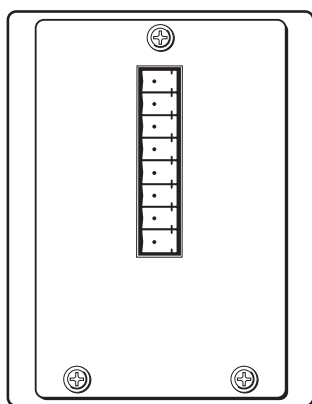

Select and prepare a suitable site for mounting the CTP150CM. The unit can be mounted in wall boxes (must be UL approved), on tabletops, in an in-table connector bay, or other MAAP-mounting options.

Step 2

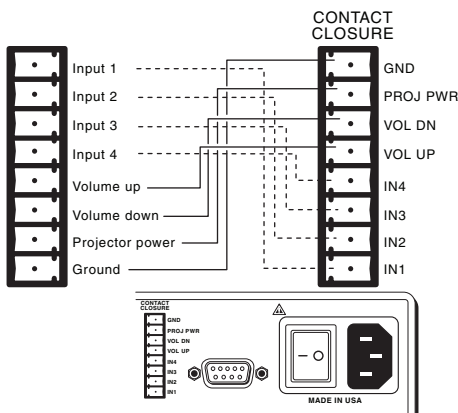

Run an eight-conductor cable between the TPT150 and the site where the CTP150CM is to be mounted.

Step 3

Connect one end of an eight conductor cable to the TPT150 and the other end to the rear panel of the CTP150CM, as shown below.

Transmitter

Step 4

Apply power to all devices and test the system.

Step 5

Disconnect power, securely mount the CTP150CM, and reconnect power to all devices.
